

## Elevation Inputs in SWAT Precip.

Posted by mednick - 2008/02/25 16:20

---

Have other folks been having trouble entering Elevation data in Step 1 of 'Write SWAT Precipitation'?

At the bottom of the ComboBox, it's only giving me the first option ('Do not include elevation data...'). The other two options are grayed-out.

I have my DEM loaded, plus a numeric elevation field in my raingage theme. I'd like to use latter, which worked for me in ver.1.5

Thanks,

=====

The Elevation Bands inputs aren't enabled yet because the functionality wasn't complete at the time of release. It should be in a forthcoming update.
